In the very south of the Istrian peninsula is a small ancient Roman town called Pula. This exceptionally high-quality new building by a proven investor with a total of four family apartments is located in Pula. This family apartment is located on the first floor of the new building and has an area of 54,95 m<sup>2</sup>. The apartment consists of an extremely spacious and bright living room with kitchen and dining room in which a sliding glass wall with electric shutters is installed, through which you can access a spacious loggia with a view of nature

and the city, two bedrooms and bathrooms. On the ground floor of the building, the apartment has a designated storage room with its own entrance door as well as one uncovered, designated parking space for an additional fee. High-quality ceramics are installed throughout the entire apartment, while laminate flooring is installed in the bedrooms. The heating and cooling system is regulated by three Samsung WindFree air conditioning units, one in each room, and a chimney was built in case of need for the future owner. The apartment is equipped with PVC carpentry with double-layered glass and anthracite color with blinds. The high-quality newly built building is located in an excellent location, close to all amenities such as shops, post offices, banks, kindergartens, schools, promenades, parks, woods and the center of Pula. The process of obtaining a building permit is underway, and given the proven and reliable investor, move-in is expected at the end of summer 2026.

The above-mentioned high-quality and economical real estate is a very interesting real estate due to its construction quality and location, and it offers various possibilities to the future owner, whether for family housing or the possibility to engage in tourist activities, renting it out and getting a faster return on invested funds.
