Pula is the largest city in Istria and one of the most desirable places to live, work and invest in the southern part of the peninsula. The city offers well-developed infrastructure, numerous amenities for everyday life, good transport connections, as well as proximity to the sea and well-known Istrian destinations.

Monvidal is one of Pula's most practical residential neighbourhoods for everyday living, especially for buyers who value easy access to amenities without the need to go into the city centre. Shops and shopping centres are located in the immediate vicinity, while the promenade along the Pula bypass offers opportunities for walking, jogging and recreation. An

additional advantage is the proximity of Pula General Hospital and a bus stop, providing convenient connections to other parts of the city. The combination of everyday amenities, public transport, good accessibility and a quieter residential environment makes Monvidal an excellent location for year-round living.

A well-maintained and functional apartment with a total area of 51 m² is offered for sale in this location, situated on the second floor of a residential building constructed in 2019.

The apartment consists of a living room with a kitchen and dining area, one bedroom, a bathroom, a storage room, and a balcony overlooking the neighbourhood. The apartment is north-facing.

The property is very well maintained. Wood-effect ceramic tiles have been installed in the living room and bedroom, while the remaining rooms feature white and grey ceramic tiles, also in excellent condition. The apartment is fitted with PVC windows and doors, while heating is provided by an individual gas heating system. The apartment is also equipped with one air-conditioning unit.

The building is well maintained and in excellent condition, with a thermally insulated façade. It is equipped with a lift and connected to the gas network and fibre-optic infrastructure, providing an additional level of comfort and convenience.

The apartment is sold with one parking space, which represents an important practical advantage for urban living.

The property has a valid occupancy permit and energy performance certificate, and the ownership documentation is in order. The complete documentation also makes the property suitable for purchase with a housing loan, subject to the conditions and valuation of the selected bank.

WHY IS THIS PROPERTY A GOOD INVESTMENT?

The apartment combines several features that remain consistently sought after on the market: recent construction, a functional floor area, a storage room, a lift, a private parking space, a balcony, individual gas heating and complete documentation.
